

CUSTOM GALLERY - CEILING/PENDANT

**PROJECT:** Clark Kerr Campus, UC Berkeley  
**ARCH:** EHDD - San Francisco, CA  
**LT DES:** ALD, David Malman - San Francisco, CA (2009)

This national landmark building required outdoor pendant fixtures that were in keeping with the mission-style architecture. Working with Lighting Designer and the Architect Borden Lighting helped create this reinterpretation of a lantern style fixture, that is both low-glare downlight only and energy efficient, while using solid bronze as a durable and sustainable material.

The bowl upright pendants feature a simple design that doesn't compete with architecture, while providing glare-free ambient lighting. (Note: Daylight controls turned the fixtures off.)
