

CUSTOM GALLERY - WALL MOUNTED

PROJECT: Clark Kerr Campus, UC Berkeley
ARCH: EHDD - San Francisco, CA
LT DES: ALD, David Malman - San Francisco, CA

Working with the Lighting Designer and Architect Borden Lighting helped create a reinterpretation of a wall lantern, which is in keeping with the mission-style architecture. The fixtures are both low-glare downlight only and energy saving, utilizing CF lamping. The wedge style fixture was designed for surface power feed and features a deeply regressed lens for low-glare.

Lantern style wall mount.

Wedge style downlight.
