

FABRICS IN ARCHITECTURAL LIGHTING

The "lamp shade" seems to have found a place in architectural decorative lighting. Many are attracted to the less commercial feel of fabric. Borden Lighting offers a family of drum ceiling mounted, pendant and wall mounted fixtures that offer fabric shades in robust specification grade products. Fabric, like color, has endless possibilities. Our standard offering offers a range of neutrals, but you can contact your rep or the factory for special fabrics. Where maintenance is an issue, we offer a washable polyester fabric that is made of 65% recycled material as well as fixtures using resin laminated fabric that is also washable.
