

# LIGHTING FOR OFFICE BUILDINGS

**PROJECT:** 601 Marshall  
Redwood City, CA  
**ARCHITECT:** Korth Suneri Hagey  
San Francisco, CA

June  
2018

The large principal entry lanterns and the smaller terrace sconces were developed from the architect's renderings and some photo images for this downtown suburban office building. The clear lensed large lantern uses a decorative LED lamp and the terrace sconce uses fixed arrays and drivers. Both fixtures are all aluminum with a bronze powder coat finish for an economical and durable finish.
