

LIGHTING FOR MULTI-FAMILY HOUSING

PROJECT: Colonnade Apartments
Los Altos, CA
ARCHITECT: Seidel Architects
San Francisco, CA

November
2017

The San Francisco Bay Area economy is currently experiencing a boom in multi-family housing. The architects for the new Colonnade Apartments project wanted cylindrical shapes for the exterior lighting. In order to provide low-glare ambient lighting for the covered walkways, the 346 pendant fixture was easily modified by adding trim bars. A modified version of the 774 exterior wall mount was also used.
