

LIGHTING FOR HEALTHCARE

Project: Fullerton Acute Care
Fullerton, CA

MAY
2013

Architect: Darden Architects
Fresno, CA

Interior Design: Color 43
Alameda, CA

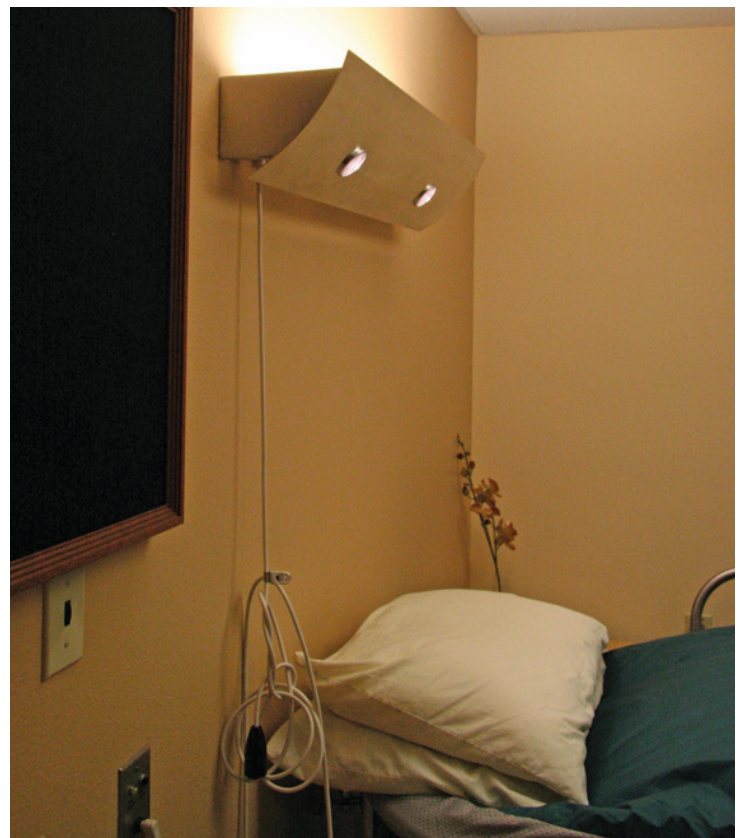

This nursing home renovation project involved extensive bathroom alterations and lighting and finishes upgrades. The overbed light is a modified standard product that provided increased light levels and patient control. This fixture uses T5 uplights and point source LEDs that function as reading light and for patient examination, while providing control of each function by the patient. The vanity fixture provides high light levels with low glare.
