

LIGHTING FOR HOSPITALITY

Project: Carmel Valley Ranch
Carmel Valley, CA

Jan/Feb
2012

Architect: Paul Davis Partnership

Landscape Arch: Bellinger Foster Steinmetz

Ltg Designer: Luminae Souter
San Francisco, CA

This project involved building renovations and upgrading and improving the exterior lighting. The lighting designer was charged with providing energy efficient and cost-effective site lighting that was dark sky compliant and with an eye toward sustainability. With very high recycled content, the Borden fixtures met the sustainability goal as well as the other design criteria, while improving way-finding and safety.
