

LIGHTING FOR COMMUNITY CENTERS

Project: Yountville Community Center
Yountville, CA

Architect: Siegel and Strain
San Francisco, CA

Spring
2010

Ltg Designer: Alice Prussin Lighting Design
Berkeley, CA

The Yountville Community Center is designed to be a multi-generational and multi-purpose facility. The facility combines a multi-purpose gymnasium, Library, Teen Room, Art Room and staff offices. The project has applied for LEED certification and features geo-thermal climate control, photovoltaic collectors, along with extensive re-use of an existing facility.

Borden Lighting is proud to have provided pendant light fixtures with dimming ballasts that respond to daylight controls. The fixtures were fabricated from cold rolled steel with high recycled content, painted with low VOC paint and utilize high efficiency CF lamps.
