

LIGHTING FOR OFFICE BUILDINGS

Custom Pendant

530-16

M712

M712

**Project: 100 Pine Street
San Francisco, CA**

**Winter
2010**

An existing highrise built in 1972, the lighting was specified by the owner.

In July 2008 100 Pine was the first multi-tenant building in California to receive LEED certification for Existing Buildings. Achieving certification required efforts involving recycling, water consumption and energy use. Collaborating with tenants, contractors and employees, they have become a recycling leader, reducing water consumption 40% and energy consumption by over 13%.

For this 36 story, 440,000 sq ft building these efforts generate annual savings of \$228,000, proving that "green" makes financial sense. Borden Lighting is proud to have been a part of these efforts by providing sustainable and energy saving lighting fixtures.
