

LIGHTING FOR PEDESTRIANS

PROJECT: Napa County South Campus
Napa, CA
ARCH: TLCD Architecture
Santa Rosa, CA
EE: O'Mahony and Meyer
San Rafael, CA

December
2018

In creating new pedestrian circulation for the Napa County Campus, the architect wanted something other than the "shoebox" parking lot fixtures. The 921 post top fixture provides smooth, low-glare lighting for the new pathway. The 921 is Dark Sky certified and is available in a two-head version.
