2010

**Architect: EHDD
San Francisco, CA**

**Ltg Designer: ALD/David Malman
San Francisco, CA**

This mission-style complex was built in the 1930's as a school for the deaf. The University of California has modernized it while converting it to student housing, preserving its status as a registered state and national landmark.

The project features pendant and wall mounted lantern style fixtures of solid bronze that are both energy efficient and low-glare, while adapting to the historic nature of the project. Borden Lighting provided a variety of decorative fixtures and is proud to have been part of the team that transformed this landmark project.
