## NEW OPTIONS

**721:** Occupancy/motion sensors are not new, but until recently the components and the cost meant they were difficult to incorporate into decorative fixtures. Technology has caught up and we are now able to offer two motion sensing options. The simplest, and lowest cost option, is a microwave sensor that mounts internally and offers simple on/off operation. We also offer a microwave sensor that allows the user to preset a dimmed light level when no one is present. The advantage of the microwave sensors is that there is no projecting lens. Note that both options include photoelectric control.

**574:** We now can offer the LED version of the 574 vanity fixture with optional battery packs, what we call IEM, for Integral Emergency. To avoid the shadow that battery pack would create, we've added an "eyebrow" of solid metal. This is available for all lengths.

**SECTION**

- 4" Ø OCTAGON J-BOX, BY OTHERS
- CAST ALUM BODY, PAINTED SEMI-GLOSS BRONZE FINISH
- 1/2"
- 0-10V DIMMING DRIVER, DIM TO 1%
- NATURAL BRONZE HOOD
- MICROWAVE OCCUPANCY SENSOR (McWONG PSC-ID-M-FM-500)
- (2) 1.6W LED ARRAYS 2300 lm EA / 3000 K / 80 CRI
- WHITE ALUM REFLECTOR
- SATIN ICE ACRYLIC LENS

**NOTE: OCC SENSOR IS ADJUSTABLE FOR DISTANCE SENSITIVITY, STANDBY TIME DELAY AND HAS BUILT-IN PHOTODIODE FOR DUSK TO DAWN OPERATION. PLEASE SPECIFY SETTINGS.**

**BOTTOM VIEW**

**NOTE: FIXTURE DOES NOT FUNCTION WITH HEXCEL LOUVER.**
